Remi Monoco, Executive Assistant
The Metropolitan Waterfront Alliance
457 Madison Avenue
New York, NY 10022

Dear Mr. Monoco:

I am applying for the position of Office Associate with the Metropolitan Waterfront Alliance (MWA) based on the recommendation of a mutual friend, Kim Power. I will graduate in May 2016 from the University of Virginia (U.Va.) with a Bachelor of Urban and Environmental Planning, a Bachelor of Arts in French and a minor in Architecture. I will be moving to New York City soon and see this position as the ideal opportunity to contribute the skills I have gained from my professional experience, academic studies, and diverse background. I share the belief with MWA that waterfront areas should be accessible for all, and I am strongly motivated to make the New York and New Jersey shores a pleasant place to live, work and play.

My organizational and communication skills are well demonstrated in my work experiences in nonprofit, corporate and student organization settings. Currently, I intern with Piedmont Council of the Arts which shares similar responsibilities to the position at MWA. During my internship, I provide administrative support, focusing on maintaining a contact database of local artists, creating a new filing system for the council and constructing e-mail campaigns. I have also interned at KPMG Audit Form, a corporate environment where attention to detail was essential when managing client files and proofreading financial statements.

In addition, I handled event logistics and publicized events when I served as publicity chair of the Taiwanese Student Association at U.Va. I have acquired a sophisticated understanding of urban affairs through my studies. My coursework included site assessment and data collection, application of planning regulations, and the development of recommendations in order to create neighborhood master plan and transportation plan. Originally from Taiwan, my residence in Germany, France and the United States, as well as my extensive travel experience have fostered an ease in working with people from diverse backgrounds.

Kim Power is sending you a letter in regards to my qualifications and I look forward to discussing my candidacy for this position with you as well. Thank you for your time and thoughtful consideration. I hope to hear back from you soon.

Respectfully,

Anna (Thi) Pan

Backetball   Gaming   Painting   Singing   Travel

Dear Hiring Manager,

I am wirting to you apply the vcant front end Web developer position at Noble Market LLC. I am confident that my skill and qualifcation fulfill the requirement you are seekng for this open position. In one of the technical meet up, I have the chance to talk to one of your senior developer and get to know some of the interesting project the company is working on, which I would love to join and contribute.

Here are some of my most releveant qualification and experience that will prove beneficial to the company:
- Extensive knowledge on major front end web development framework
- Experience in web application optimaztion
- knowledge of integration and unit testing, trouble shooting and debugging
- Understanding the full web development process (design, develop, deploy)
- Collabrated closely with UX/UI and backend developer

Currently, I am enrolled in a master's program focusing on Web development and willing to open to work full-time during the summer. Although based in New York, I am willing to relocate if necessary. Please let me know if there is anything else you need on my end. I look forward to learning more about this opportunity.

Sincerely,

Tony Lin

Dear Hiring Manager,

I would love to apply for the Full Stack Software Engineering Intern position at NewsCred, New York, NY which was posted on the Indeed.com. I am very interested in this position because I think my core skill set match up the job requirement, and this is a great opportunity for me to keep growing and enhancing my skill and expertise as a web developer.

I have great experience and extensive knowledge in Javascript/HTML/CSS and popular web development framework like ReactJS, AngularJS, NodeJS. I have worked on multiple web application projects (Single Page App) using Javascript as the full-stack language and building up RESTful API server using NodeJS. I also have working knowledge of both relational and non-relational database like PostgreSQL, MongoDB. I enjoy building rich interactive web app. If you want to learn more about my most recent projects, feel free to check out my portfolios site listed below.

Currently, I am enrolled in a master's program focusing on Web development and willing to open to work full-time during the summer. Although based in New York, I am willing to relocate if necessary. Please let me know if there is anything else you need on my end. I look forward to learning more about this opportunity.
